MAKE
IDEAS
WORK**

Teaming-up and making ideas work

Your ambition is our starting point, your strategic objective our driving force. Bilfinger Tebodin has the knowledge of your market and your ambitions, and vision on current developments. We are dedicated to delivering every project - from start to finish - on time, meeting quality requirements and within budget.

That's how we make the best ideas work. We are your independent partner on every level. Flexible, solid, and safe. Bilfinger Tebodin can call on the expertise, experience, and passion for technology of 3,200 professional consultants and engineers, as well as a global competence network of 37,000 industry-focused Bilfinger specialists around the world.

Teaming-up with customers and driving innovation with integrated consultancy and world-class engineering solutions. Combined with professional project- and construction management, Bilfinger Tebodin delivers excellence wherever you are located.

» Cutting-edge consultancy and engineering - worldwide

Customer orientation

Our customers' ambitions and developments in their markets are the starting point of our services. By closely monitoring economic, technical and social developments, we help our customers to act on opportunities. Adding value to their investment projects with our services, from the first idea through to operations and beyond. In trusted relationships with our customers we optimize our services, across borders, safeguarding all international standards and developments.

BIM as the basis

By using BIM as the basis for all industrial design projects, our consultants and engineers can involve all project stakeholders early in the design process. More effective and digital disclosure of available project data stimulates cooperation between all engaged stakeholders and reduces costs.

Safety and Quality

Health, safety, environment and quality are at the core of our operation. We aim to reduce to zero any impacts of our operations on people, communities and the environment. Delivering top quality requires a common approach, using value-based principles and acting on international standards in HSEQ.

Eight main markets

In eight main markets we offer customers a broad variety of services with a multidisciplinary approach. Based on our extensive market knowledge and clear vision on global developments we work with customers in: Industrial, Food & Beverage, Energy & Utilities, Oil & Gas, Chemical & Petrochemical, Infrastructure, Pharma & Biopharma, and Property.

Independent services

Our independent services cover all phases of a project; from initiation to completion. Consultancy, design and engineering, project management, construction management and procurement are all part of our broad portfolio to customers around the world.

Passion for technology

You can count on our highly skilled professionals with a passion for technology. They operate from 35 offices located in 17 countries in North West Europe, Central & Eastern Europe, the Middle East and North America. Putting over 70 years of knowledge and experience at your disposal.
